ANTI-THEFT SPEAKER MOUNT

Wall or Ceiling Speaker Mount

The **TVARMSP03** is steel and aluminum constructed heavy-duty wall/ceiling mount, holding speakers up to 15kg. The large square plate attaches to the wall/ceiling and the small rectangular plate attaches to the speaker. The speaker mount enjoys the most flexibility in use, with disc joint design with compression lock allowing 90° adjustment and adjusting knob offering 360° rotation. When fully stretched, the mount puts speakers 140mm from the wall/ceiling. Steel security cable included prevents speakers from falling off the wall.
