INNOVATE.

Innovative Technology for Seamless Guest Experiences

At Space Technology Hospitality Solutions, we provide cutting-edge technology designed to enhance guest experiences and optimize operations across hotels, guesthouses, resorts, lodges, and restaurants. Our solutions ensure seamless connectivity, high-quality entertainment, and smart automation, creating an efficient and future-ready hospitality environment.

EXPERIENCE.

Why Choose Us?

With Space Technology Hospitality Solutions, clients can enhance guest satisfaction, optimize operations, and future-proof their technology infrastructure. Our expertise in system design, network management, and entertainment solutions ensures seamless integration and superior performance.

QUALITY

We offer a full range of cutting-edge solutions, from high-speed connectivity and premium entertainment to smart automation and security. Our products are sourced from trusted brands, ensuring reliability, scalability, and long-term performance.

KNOWLEDGE

With years of experience in hospitality technology, we understand the unique challenges of hotels, guesthouses, resorts, and restaurants. Our team of experts provides tailored solutions that enhance guest experiences and improve operational efficiency.

FUTURE-PROOF

Hospitality technology is constantly evolving, and we stay ahead of the curve with our finger on the pulse of the industry. Our solutions are designed for seamless integration, easy upgrades, and future scalability, keeping your business competitive in a digital world.

SUPPORT

We provide dedicated customer support, from initial consultation to installation and ongoing maintenance. Our team ensures smooth implementation, minimal downtime, and responsive assistance to keep your systems running at peak performance.

ENTERTAIN.

HOSPITALITY TV

Delivering high-quality television content to multiple rooms efficiently is essential for guest satisfaction. Our headend and modulator solutions allow hotels to receive, process, and distribute digital and satellite TV channels across the entire property. Whether offering local channels, premium international networks, or customized in-house content, this solution ensures a clear and uninterrupted viewing experience. With centralized management and minimal maintenance, hotels can provide a reliable, high-definition TV service that enhances the guest experience.

**TRANSFORMING HOSPITALITY
EXPERIENCES FOR OWNERS,
EMPLOYEES, PATRONS & GUESTS.**

COAX NETWORK CONVERSION

Upgrading to modern digital services doesn't always require a complete infrastructure overhaul. Our coax network conversion solution enables hotels to transform existing coaxial cabling into a robust digital network capable of supporting IPTV, high-speed internet, and VoIP services. This cost-effective approach allows hotels to modernize their entertainment and communication systems without the need for extensive rewiring, making it a practical and efficient solution for properties looking to enhance their guest offerings.

ENGAGE.

01

OTT SERVICES

As streaming services continue to dominate entertainment preferences, Over-The-Top (OTT) content delivery has become a must-have feature in modern hotels. Our OTT server solution enables direct, high-quality content streaming over hotel Wi-Fi, allowing guests to access video-on-demand, live TV, and custom hotel-branded channels without relying on traditional satellite or cable providers. This enhances the entertainment experience while optimizing network bandwidth for smooth and uninterrupted viewing.

02

CCTV & SECURITY

Ensuring the safety of guests, staff, and property is a top priority for hospitality businesses. Our advanced CCTV security systems provide 24/7 surveillance with high-definition video recording, remote access monitoring, and AI-powered analytics for threat detection. Additionally, our access control solutions allow hotels, guesthouses, and restaurants to manage entry points securely through keycard access, biometric authentication, or mobile-based credentials. These security solutions enhance protection while maintaining a seamless and welcoming guest experience.

03

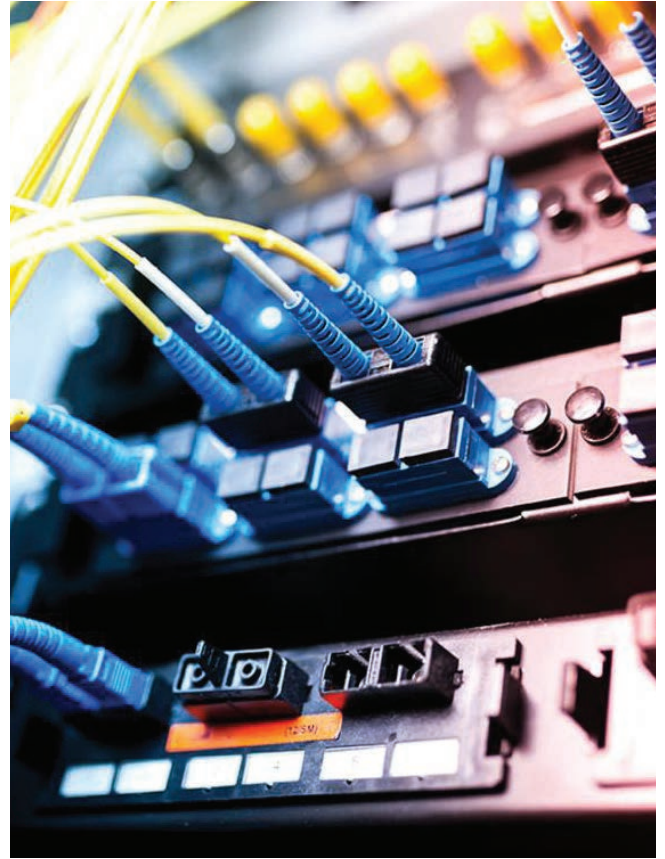

DIGITAL SIGNAGE

Engaging and dynamic communication is essential for modern hospitality environments. Our digital signage solutions provide an effective platform to display important information, promotional content, wayfinding assistance, and real-time updates. Whether welcoming guests, advertising special offers, or providing event schedules, digital signage enhances communication and reduces reliance on traditional printed materials. Offering customizable content and remote management capabilities, to improve guest engagement.

CONNECT.

GPON FOR INTERNET, IPTV & VOIP

A strong, scalable, and cost-efficient network is essential for modern hospitality services. Our GPON (Gigabit Passive Optical Network) solution delivers high-speed internet, IPTV, and VoIP services over a single fibre-optic infrastructure. By replacing multiple legacy networks with a streamlined optical solution, hotels benefit from reduced operational costs, improved network efficiency, and the ability to support increasing data demands. This future-proof technology ensures seamless connectivity for guests while enhancing hotel management capabilities.

CASTING SERVICES FOR GUESTS

Personalized entertainment is a key expectation for today's travelers. Our casting service enables guests to securely stream their favorite content from their personal devices directly to the in-room TV. This eliminates the need for shared logins on public devices and ensures privacy while offering a home-like entertainment experience. With seamless compatibility across major streaming platforms, this feature allows guests to enjoy their preferred content with ease and convenience.

INTEGRATE.

SYSTEM DESIGN & INTEGRATION

A well-planned system is the foundation of a successful hospitality technology setup. We design and implement integrated solutions that bring together entertainment, connectivity, and smart automation into a single, scalable network. Our approach ensures smooth interoperability between various technologies, reducing complexity while enhancing efficiency and performance. Whether upgrading an existing system or building from the ground up, we create tailored solutions that meet the unique needs of each property.

FIBRE TO THE ROOM (FTTR)

Guests expect fast and reliable internet access, and fibre-optic technology provides the highest level of performance. Our Fibre to the Room (FTTR) solution replaces outdated copper cabling with ultra-fast, low-latency fibre connections. This upgrade enables seamless streaming, high-speed downloads, and stable connections for video calls and business applications. With improved bandwidth and scalability, hotels can meet the increasing demands of modern travelers while ensuring a future-proof network infrastructure.

TRANSFORM.

PUBLIC ADDRESS SYSTEMS

Enhance the ambiance of foyers, restaurants, and pubs with our high-quality public address systems. These solutions provide crystal-clear, customizable background music for both indoor and outdoor areas, ensuring an inviting and immersive atmosphere. Whether setting the tone for a relaxing dining experience or energizing a bustling bar, our systems deliver superior sound quality. Additionally, these systems can be used for important announcements and emergency alerts, ensuring seamless communication throughout the property.

CONFERENCE & MEETING ROOMS

Our multimedia solutions transform conference and meeting rooms into dynamic, high-tech spaces that enhance productivity and engagement. From state-of-the-art interactive presentations to intuitive digital wayfinding displays, we provide seamless integration of cutting-edge audio-visual technology. Our solutions include wireless presentation capabilities, video conferencing support, and automated room controls, ensuring a hassle-free and professional meeting experience for business travelers and event organizers alike.

VIDEO WALLS

Create a lasting impression with our high-definition video walls, designed to captivate audiences with visually striking, dynamic content. Whether used for wayfinding, branding, event promotions, or immersive entertainment, these adaptable screens provide vibrant, crystal-clear visuals. Hotels can effortlessly update and customize content in real-time, ensuring guests receive relevant information while enhancing the overall aesthetic of lobbies, conference centers, and public spaces.

STREAMLINE.

IN-BUILDING CONNECTIVITY

Reliable communication is essential in modern hospitality environments. Our in-building communication solutions leverage LTE and 5G cellular repeaters to ensure strong, uninterrupted mobile coverage throughout the property. By eliminating dead zones and improving overall signal strength, guests and staff can enjoy seamless connectivity for voice calls, messaging, and data services, whether in their rooms, conference spaces, or common areas. This enhances guest satisfaction and operational efficiency while supporting critical hotel functions such as mobile check-in and contactless services.

EVACUATION (EVAC) SOLUTIONS

Ensuring guest and staff safety is paramount in any hotel environment. Our EVAC solutions provide a fully integrated emergency communication system designed to facilitate clear and efficient evacuation procedures. Utilizing automated messaging, strategically placed audio alerts, and visual notification systems, our technology ensures that crucial safety information reaches all occupants promptly. From fire alarms to security threats, our solutions help hotels comply with safety regulations while offering peace of mind for guests and staff alike.

PRODUCTS & ACCESSORIES

We provide a comprehensive range of high-quality products and peripherals to complement our hospitality solutions. Our inventory includes a variety of TV mounts, universal remote controllers for TVs and air conditioning units, as well as premium audio-visual cables and connectors for seamless system integration. Whether upgrading an existing setup or installing new equipment, our accessories ensure reliable performance, ease of use, and a polished, professional guest experience.

SIMPLIFY.

Get in Touch

Get in touch today to explore how we can transform your hospitality environment into a smarter, more connected, and more immersive destination.

ACCOMMODATION

Elevate guest experiences with seamless connectivity, in-room entertainment, and smart automation for hotels, resorts, and serviced apartments.

FOOD & BEVERAGE

Create the perfect ambiance with public address systems, digital signage for promotions, and reliable connectivity for seamless operations in restaurants, bars, and cafés.
