 **SPACE**
DIGITALSIGNAGE

POWERED BY:

WAAPITI

Discover the ideal platform to manage any screen quickly and easily. At any time and from anywhere.

The Space Digital Signage Waapiti platform is one of the most powerful and advanced software on the market. It is managed from an intuitive and easy-to-use, cloud-native, serverless and scalable interface. Everything is in a single platform and has an intuitive interface which is easy to use and compatible with any type of device.

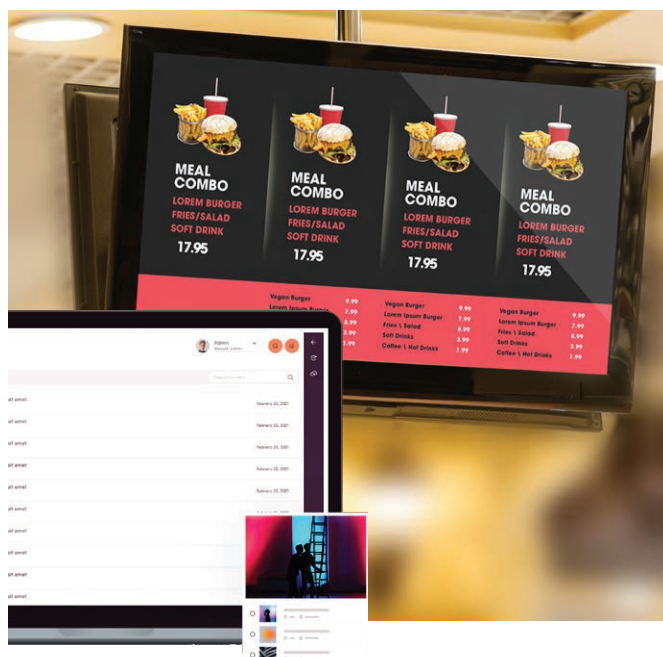

Why Waapiti

- It allows you to manage content on any type of screen.
- It covers the needs of any simple or advanced project.
- It offers support at all stages of the project.
- It is easy to set up and easy to scale.
- Its technical service covers 14/7.
- It integrates with any operating system, hardware and third party software.

Start playing signage content in just a few clicks.

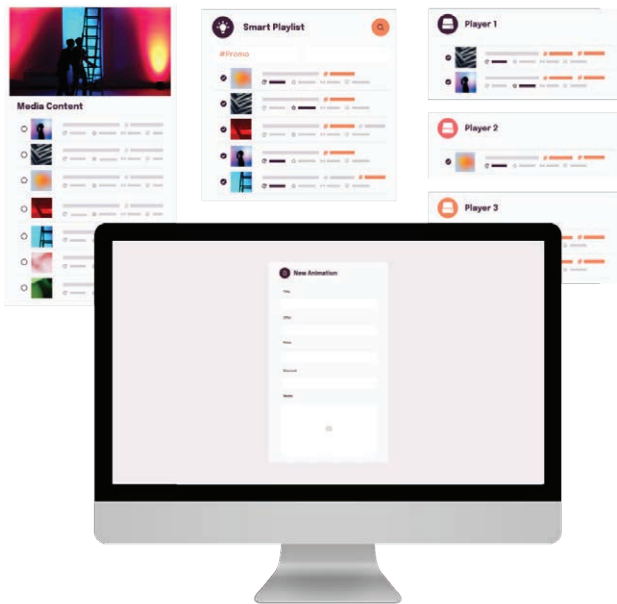

Discover the Space Digital Signage Waapiti platform: cloud-based software, serverless and scalable. A human-friendly and intuitive interface to distribute content everywhere. The platform is 100% responsive and adapts to any device. Define your campaign, create your channel and start communicating!

- ✓ Create HTML content easily, simply adding your own pictures and text. Adapted to several layouts!
- ✓ Communicate different messages at specific times of the day or on specific days with specific offers.
- ✓ Show content on your screen with live data from websites, social networks, video streams, or any other online data source.
- ✓ Upload and manage your content easily, and organize it using tags or creating playlists.
- ✓ Tag content and players by different criteria and create playlists and schedules automatically.

The power of a screen is infinite. You just have to know how to manage it.

Waapiti is the next generation web-based, serverless and scalable digital signage platform. It has an intuitive interface which is easy to use and compatible with any type of device. Just what a display needs.

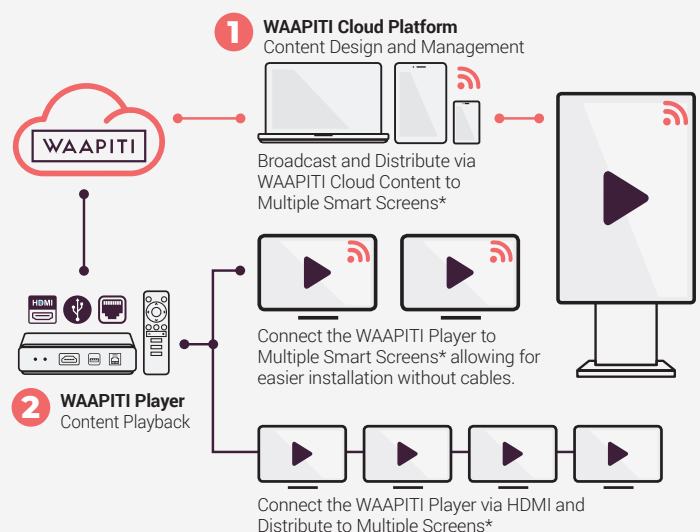

- **Plug & Play.**
Connect players to any display and start playing content instantly.
- **Automatic updates.**
Receive software updates and improvements without any intervention from your side.
- **Network monitoring.**
Check the status of your players network.
- **Scales up.**
Add players and tag them easily to create schedules for each player.
- **Store & forward technology.**
Downloaded content and schedules keep playing, even during connectivity issues.
- **Video scaler.**
Automatically scales content. No need for an extra scaler.

Space Digital Signage allows you to connect everywhere.

The Space Digital Signage, powered by WAAPITI is a cloud based digital signage platform which connects everywhere allowing you to engage with your customers across multiple screens.

- 1 Annual Licence:**
Simply sign-up for a Waapiti Annual Licence, download the app to your SmartTV & start building your next in-store campaign.
- 2 Signage Player:**
No SmartTV - no problem! Connect your Waapiti Digital Signage Player to the Cloud Platform and run your own designed signage campaigns via HDMI to your signage displays. The Waapiti Digital Signage Player comes bundled with an Annual Licence and all required software pre-installed.

Space Digital Signage allows you to easily display & manage images, videos, websites & more

* The WAAPITI standalone player allows for connecting to multiple screens, depending on the A/V installation. Each WAAPITI Player Licence allows for distribution of up to five screens, additional licences will be required for extra screens. The WAAPITI Platform is compatible with most of the devices from the main manufacturers on the market, and operating systems.

Seamless Integration.
Boundless Opportunities.
One unique supplier!

Make the most of your display screens - unleash their potential!

The Waapiti Platform offers advanced digital signage solutions.

Waapiti's Digital signage platform is one of the most powerful and advanced software on the market. It is managed from an intuitive and easy-to-use, cloud-native, serverless and scalable interface.

Different user roles to co-manage the broadcasting of content.

Add different functions such as content approval, access as a partner, customer or location or group of locations, personalisation of the channel by locations.

Scheduled and automated content management.

It enables intelligent content distribution by creating dynamic content lists, based on content and player tags.

It is managed in the cloud.

The Waapiti platform grows automatically thanks to a cloud-native architecture, which allows for unlimited scalability and high availability.

It has a very intuitive interface.

And it makes it very easy to start adding content in just a few clicks and have control over the editing, timing and distribution of content.

It improves the user experience.

It has different user levels, background functionality, mass actions on specific screens and launches specific content at specific times.
