

THE CONNECTION BEHIND EVERY SIGNAL.

COMMERCIAL PROJECT SOLUTIONS

DISCOVER.

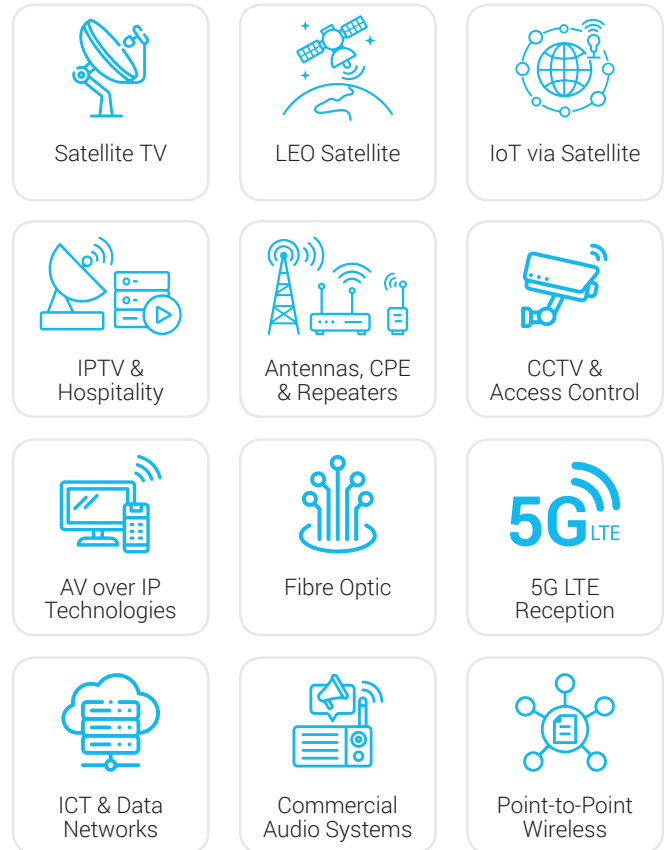

Your Trusted Partner in Signal Distribution and Connected Technology.

At Space Technology, we understand the power of connection.

For over two decades, Space Technology (formerly Space Television) has been South Africa's leading name in signal distribution and connectivity technology, and a trusted supplier to clients across the African continent and beyond.

From the smallest installation to the largest commercial rollout, we deliver a complete, export-ready ecosystem of solutions including LEO satellite connectivity, point-to-point wireless links, and advanced signal distribution technologies.

Our offerings are supported by professional technical expertise, reliable logistics, and deep industry experience, enabling resilient, scalable connectivity for commercial, industrial, and remote environments.

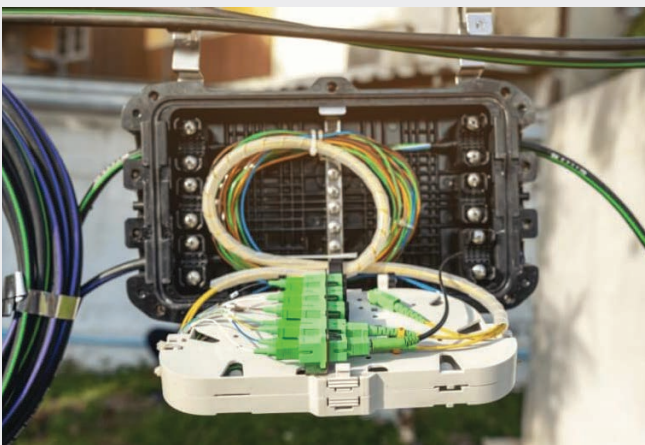

PARTNER.

Delivering End-to-End Equipment and Solutions.

Our product offering is as comprehensive as the industries we serve. From satellite dishes and LNBs to LTE antennas, fibre optic cabling, surveillance systems, network switches, and everything in between - we supply all the building blocks that installers, integrators, and resellers need to create reliable, future-ready infrastructure.

But we offer more than just hardware. Space Technology's experienced technical teams provide guidance on product compatibility, installation requirements, and system design, helping ensure that every solution is correctly specified, delivered, and supported. This gives our partners the peace of mind that they're working with a supplier who understands both the product and its application in the real world.

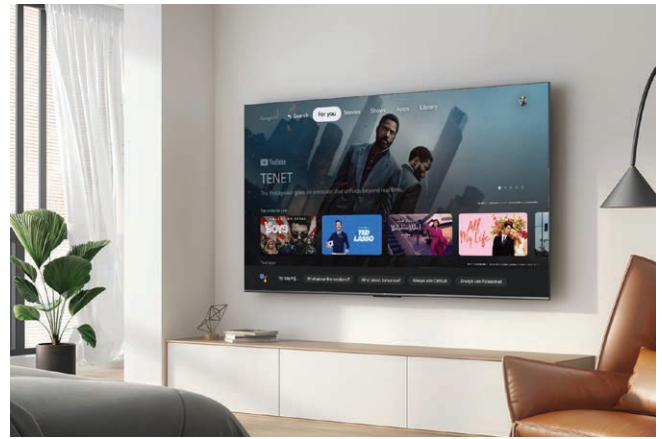

SOLUTIONS.

Designing Solutions that go Beyond the Box.

Space Technology offers more than just equipment - we deliver integrated solutions for commercial rollouts, enterprise infrastructure, and evolving tech environments.

From IPTV systems for hospitality, to fibre networks, audio visual, and access control for corporate and education sectors, our solutions are designed with performance and compatibility in mind. We support retail with reliable digital signage systems, and enable LTE/5G connectivity with antennas, routers, and signal boosters, ideal for rural or underserved areas.

Every solution is backed by expert advice, reliable supply, and hands-on support tailored to your market's needs.

RELIABLE.

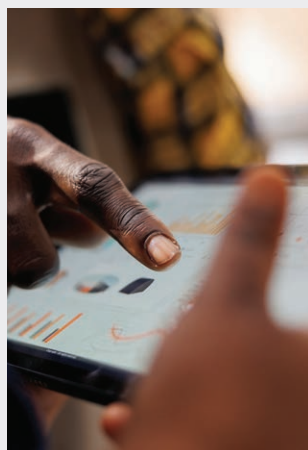

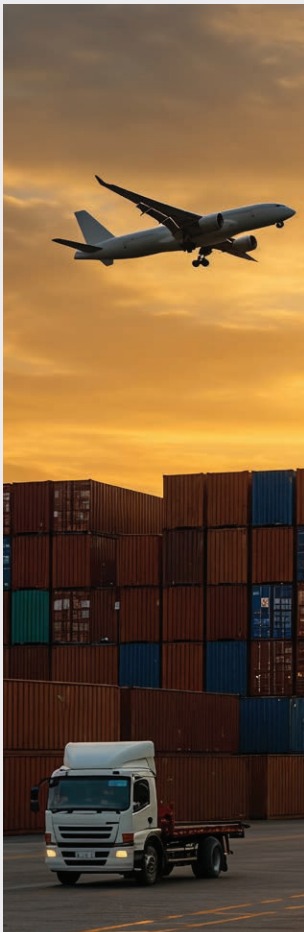

Exporting With Confidence, Across Africa and Beyond.

Space Technology's export division is structured to make cross-border business simple, efficient, and dependable.

Whether you're an established distributor or an emerging installer, we provide support every step of the way - from selecting the right solution for your market, to ensuring safe, timely delivery of your order.

Our logistics capabilities are proven across the continent, with regular shipments to countries such as Nigeria, Ghana, Kenya, Zambia, Mozambique, Namibia, Botswana, Tanzania, Malawi, and beyond.

Each order is handled with care and attention to detail, ensuring correct documentation, efficient packing, and effective communication throughout the process. In an industry where reliability is everything, we make it our business to be the partner you can depend on.

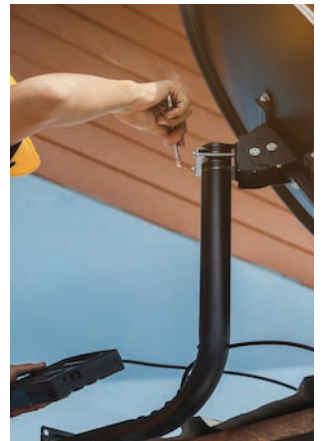

TRUST.

Developing Trust - Built on Years of Expertise, Service and Integrity.

With over 20 years in the industry, Space Technology has built a reputation for integrity, consistency, and expert-level service. Our clients choose us not just because we supply the right products, but because we make the entire process of sourcing, shipping, and supporting technology simpler.

We work closely with partners across Africa, helping them grow their businesses and deliver exceptional installations. Whether you're developing a new market, launching a regional rollout, or upgrading existing infrastructure, Space Technology is your trusted partner - from the first enquiry to the final signal test.

CONNECT.

Linking People, Projects and Possibilities.

When you choose Space Technology as a partner, you're not just getting equipment, you're gaining a professional support team, a responsive export network, and a partner who understands the demands of your industry and region.

If you're looking for a long-term supply partner for signal distribution, connectivity, and security infrastructure, we'd love to talk.
